

Water heat

Fan heater SWX C / D / H

Fan heater for harsh environments, water connection

Application

SWX is a range of fan heaters suitable for environments with strict demands on materials and safety. Models are available for use in dusty or corrosive environments and in rooms with high temperatures.

Comfort

Fraco's fan heaters provide comfortable heat quickly. The SWX fan heater makes it possible to bring comfort to environments with special requirements.

Operation and economy

Fraco's fan heaters have a long life and providing fast and effective heating at a low cost. Smart design facilitates maintenance and makes installation easy.

Design

Fan heater SWX has a robust design, adapted to the requirements of harsh environments. Supplied with air director with individually adjustable louvres that direct the air flow on one plane. The front of SWX C and SWX D can be opened for easy cleaning. SWX H has an inspection hatch with quick release.

Product specifications

- Fan heater SWX is available in following versions:
 - SWX C is intended for corrosive and damp environments, e.g. offshore and chemical industries. Casing, air deflector grille and bracket made of acid-proof stainless steel (EN 1.4404). Water coil with acid proof stainless steel pipe. Aluminium fins with nano-coating. Corrosion class C5-M.
 - SWX D has been specially introduced for dusty environments, such as industrial and joinery premises. Casing air deflector grille and bracket made of acid proof stainless steel (EN 1.4404). Water coil with copper pipe. Aluminium fins with a fin gap of 4.2 mm, to minimize the risk of dust and particles blocking the coil.
 - SWX H is intended for rooms with high temperatures, up to 70 °C, such as in the drying and curing industry as well for decontamination. Casing in stainless steel (EN 1.4016). Water coil with copper pipe. Fins made of hydrophilic coated aluminium for easier cleaning and improved durability.
- High protection class, IP65.
- SWX C/D is supplied with brackets for wall or ceiling mounting. A wall bracket is included for SWX H.

SWX is also available in a version for environments with a temporary explosion risk, see separate chapter for SWX EX.

Dimensions

Mounting and connection

Mounting

SWX C/D

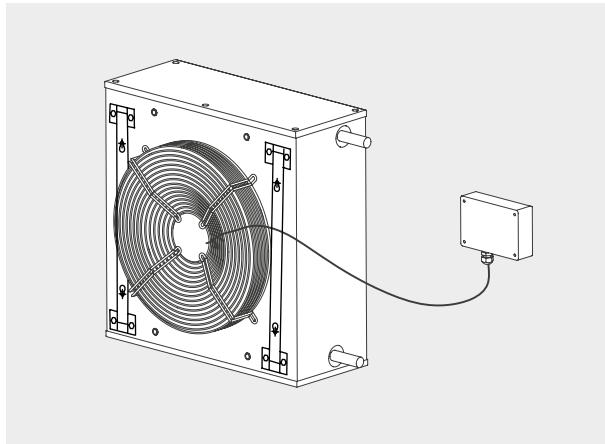

The fan heaters can be permanently mounted on a wall for horizontal air distribution, or on the ceiling for vertical air distribution. Delivered with brackets for wall or ceiling mounting. For minimum distance, see dimension diagrams.

SWX H

The fan heaters are mounted on the wall. Wall bracket included. For minimum distance, see dimension diagrams.

Connection

The fan motor is connected to a detached terminal box, which is mounted on a wall next to the unit (0,85 m cable).

Connection of heating coil

By turning the fan heater, pipe connections are possible on both sides. Units that are likely to be exposed to air temperatures below zero, for example when a mixing cabinet is used, should be equipped with external frost protection to ensure that the heating coil is not damaged by frost.

RE1,5/RE3/RE7, 5-step change-over switch for air flow

Controls the air flow in 5 steps. **RE1,5** controls maximum 1,5 A. **RE3** controls maximum 3 A. **RE7** controls maximum 7 A. To control the heat, a suitable thermostat and a valve + actuator are needed. IP54.

TVV(S)20/25, valves + SD20, actuator

TVV(S)20/25, 2-way regulation valve and SD20, actuator on/off provides a basic form of water regulation, without the possibility of adjusting or shutting the water flow off, e.g. when making maintenance. A suitable thermostat is chosen to regulate TVV(S)20/25 and SD20. DN20/25.

SWXCDFT, wire mesh filter

Mounted directly in the fan heater and provides the heating coil with basic protection. The filter is easily accessible for mounting and cleaning. The filter can be reused after cleaning.
